

BEST STAMPING Pvt. Ltd.

Mfg. All Type of Electrical Motors & Submersible Pumps Stamping.

ALL TYPE OF ELECTRICAL MOTORS & SUBMERSIBLE PUMPS STAMPING MANUFACTURER

COMPANY PROFILE

www.beststamping.in

We are pleased to introduce ourselves as manufacturer and exporter of Electrical Stamping used for various applications for day to day Business.

About Us

Best Stamping Pvt Ltd is well known company in the field of electrical stamping in east india which is established in 1996 by Mr. Shailesh S Patel.

We are world class quality manufacturers for verity of stamping and lamination used for motors, alternators, switchgears, automobile, pump, power tools, ceiling fans and transformer.

Quality Assurance

An ISO 9001- 2025 and TUV certified driven organization enabling us to offer zero defect products to our end customer.

Stringent quality procedures are conducted to provide best quality products to the clients. From the very first stage of raw materials procurement to the last stage of processing of the products, strict quality measures are maintained to deliver the best quality products to the clients. A team of quality analysts are engaged in conducting the tests for the product in the well equipped labs. These products are checked on the basis of chemical, dimensional and electrical parameters.

VISION :

We deserve the confidence of our existing clients and enhance our reputation to earn recognition and trust of future partners. With Our aim is to further broaden our horizons and become one of the leading contributors of stampings and lamination to the global electrical industry

MISSION :

To exceed our customers`s expectations in terms of quality, service and technology as a mind set driving continuous improvement in all areas.

Product We Offer

Unit is capable of producing varieties of stamping for domestic as well as international market.

All size of electrical and submersible motor stampings with auto stack stator and rotor, argon welded, riveted and cleated type of stator, aluminium die cast rotor, alternators and windmill motor stampings with transformer lamination.

Annealing

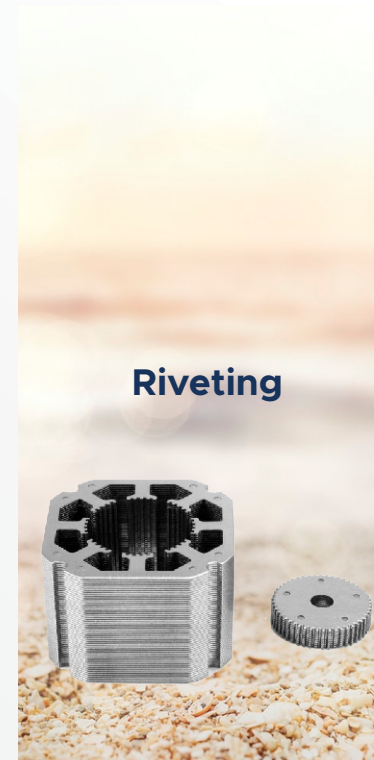

Die Casting

Cleating

Interlocking

Riveting

Segmented lamination

Single Notching

Argon Welding

GLOBAL SOURCING

With long associations and experience, we have developed a global vendor base for sourcing of the most varied proportions of electrical steel to facilitate the requirement of an expansive customer base.

Why Us

Company is able to produce 12000 MT / annum of finish good stamping with infrastructure that is sprawling across an area of 1200 sq yards Having high speed punching press ranging from 360 Mt to 200 Mt along with 100 nos of manual power press and notching machines allow us to get desired output within given time frame.

We have a state-of-art tool room equipped with all necessary machines for the manufacturing and maintenance of our precise tools used across various processes. Our sophisticated progressive carbide tools require extensive care and maintenance, which is made easy by our highest quality surface grinders, wire-cut machines, cylindrical grinders, lathe machines, VMC machine etc.

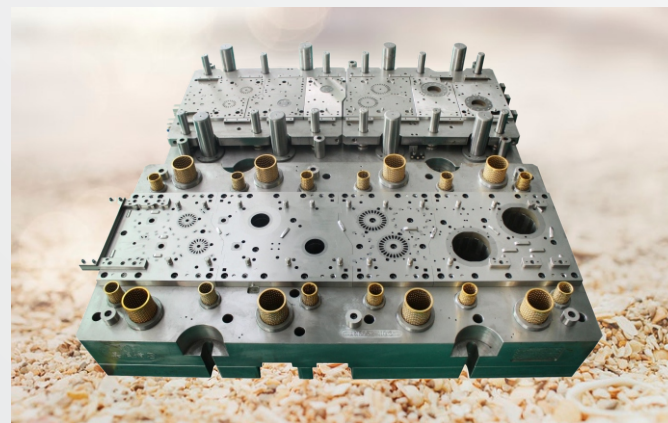

Our well established R & D unit is constantly engaged in technological development to give the clients with best quality at competitive prices. This team has highly qualified engineers and research expert who have been in industry for years. This team prepares detailed reports & conducts market surveys to improve our range of products.

TOOL DESIGN & TOOL ROOM

Precision Surface Grinder

Double Row progressive tool

Notching tool with
programmable die set

CNC Wire Cut EDM

CNC VMC Machine

Power Press
